## Knowledge is Power Learn about Youth Vaping

Just as the older generation had to be educated about the dangers of smoking cigarettes, we are now in a place and time where our young people are faced with the challenges of VAPING - a new generation of nicotine addiction using e-cigarettes. It is prevalent among our middle and high school youth, and it's easy to hide.

We know that e-cigarettes are a better alternative than smoking but risks are present, especially to our youth. Come learn and talk about these risks.

Parents, please join us at to hear Donna O'Connor LCSW, LCADC and Lee Ann O'Leary LCSW give a talk entitled Knowledge is Power.

Donna and Lee Ann are Master Level clinical therapists in the field of Addiction and Mental Health with over 15 years of experience. They will help parents improve our communication with our children and our knowledge of the dangers of drug, alcohol and vaping use in adolescents.

Borough School middle school students will be attending a related vaping presentation by the same presenters on January 16th. If you have high school students who you would like to learn about vaping, feel free to bring them with you. The presentation is targeted for parents, but we hope to open discussion between parents and students.

*Funded by a grant from the Governor's Council on Drug and Alcohol Abuse (GCADA)*
